Guidelines

It is important to remember that, in order to get a certain type of service, it must be identified as a need in your IPP. Also, regional centers cannot pay for services that another agency is required to pay for. In addition, some types of services have very strict requirements in the Lanterman Act that must be met for regional center funding.

This is not an exhaustive list. If you need a particular service, the regional center is obligated to help you find it from a generic resource or develop and pay for it.

Note: Regional centers are prohibited from funding non-medical therapies unless the therapy is the primary way of ameliorating your disability. They also may not fund social/recreational or camping services for the time being.

Please refer to the Lanterman Act, Section 4512(b). (California Welfare and Institutions Code)

Continued from Inside

Supplies
