

Alameda County Pharmacy Directory - Pharmacies offering Tdap vaccine to pregnant women Updated 9/2022

The Centers for Disease Control and Prevention (CDC) recommends that pregnant women receive the whooping cough vaccine for adolescents and adults (called Tdap vaccine) during the third trimester of **each** pregnancy. Pregnant women should get a dose of Tdap preferably between the early part of gestational weeks 27–36, to protect the newborn from pertussis.

The very best place to go for all vaccinations is your doctor's office. If Tdap vaccination is not an option at your doctor's office, your local pharmacy may offer the service. Below is a list of pharmacies who offer Tdap vaccinations to pregnant women and see Alameda Alliance patients.

Before you go:

- Obtain a prescription for Tdap from your doctor
- Call ahead to the pharmacy to check Tdap is in stock and for the best time to arrive
- If you have it, always bring your immunization record and your health insurance ID card
- It is best to wait to go to the pharmacy a half an hour after opening and go at least an hour before closing

Go to <https://ncpa.org/pharmacy-locator> to input your address and see a map of pharmacies located closest to you.
